

INTERNSHIP

Applying for Internships CVs and Cover Letters

16/09/2026

Trinity Careers Service
Hester Jackman
Careers Consultant

What we will cover today:

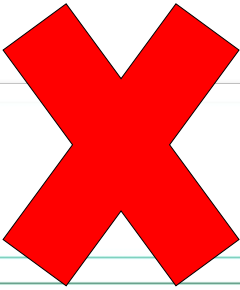

1. What employers want to know
2. Applicant Tracking Systems (ATS)
3. Job descriptions and tailoring
4. Key elements of a CV
5. Cover letters/emails
6. Using AI
7. Choosing the right internship
8. Careers Service Resources

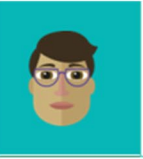

What employers want to know

- Your academic performance
- Your skills and when you applied them in projects or work experience
- Your achievements and impact – at work, in projects, volunteering etc
- How you fit - with the culture and the role

Applicant Tracking System (ATS) Friendly

- Simple, clear formatting, no tables, boxes, graphics
- Word into PDF is safest
- Accuracy, title of degree, dates, graduating year, key words from job description
- Use standard headings (see template next slide)
- Use a font which is clear, professional and easy to scan
 - Calibri or ariel are reliable
 - Font size 10-12pt - body, 14-16 - headings

Mick O'Neill

Skills – They need... I offer...

Susquehanna

Site Reliability Engineering University Co - Op Placement 2027

Dublin, Ireland • Technology - Infrastructure, Support + Engineering • January 2027 Start

What we're looking for

Who you are:

- **Technical:** You have a good level of understanding of TCP/IP protocol suite and an object-oriented language like Java/C# desirable. A familiarity with networking technologies such as switching and routing; as well as hardware internals, such as RAID, RAM, Busses, NICs & CPU architecture.
- **Education:** You are studying a STEM related degree in an Irish university and are required to do a work placement as part of your course requirements.
- **Problem Solver:** When it comes to solving problems, you use clear and sound reasoning. You're rational and like to use numbers and data to come up with sensible solutions
- **Curious:** You're eager to learn and develop new technologies. You're inquisitive and creative, questioning the status quo
- **Communicator:** You enjoy building relationships with those you work closely with. You enjoy sharing ideas, expressing your thoughts, and listening to the views of others.
- **Ambitious:** You constantly set yourself goals in life and give your all to achieve them. You're not afraid to put in the effort to reach your full potential

Client AI (Movidius NPU) Internships

Job Description

Client AI (Movidius NPU) group specializes in design of high-performance, ultra-low power Neural network IP (NPU) technology for advanced AI applications. Step inside our world and you'll find one brilliant mind after another working together in a spirit of collaboration that is simply contagious. And through this shared dedication, a culture of innovation and exploration, we do more than deliver the latest technologies. We deliver the future. And this is where you come in. We need innovators and proven communicators like you to push our thinking. We need your strong collaboration and organizational skills, as well as your ability to effectively work with and manage teams. You will help push us to the next level. Joining Client AI (Movidius NPU) means joining a dynamic team at a company that has established a reputation for innovation.

Required Competencies

- Strong analytical & problem-solving skills.
- Self-motivated with ability to work independently and manage stakeholders.
- Excellent written and verbal communication skills.
- Demonstrated team dynamics / ability to work as part of a high performing team.
- Ability to deal with ambiguity in defining activities and direction.
- Good planning & organization skills.

Personal Details

Full Name

City, email, mobile, LinkedIn/Github

Do not include gender or date of birth

Personal Statement / Professional Summary

Can be the differentiator that gets you through to next round!

Make it specific to the role applying for.

1. Who you are.
2. What skills you have, with evidence (relevant to role).
3. Your goal.

Fourth-year Computer Science student at Trinity College Dublin with strong analytical and problem-solving skills, developed through systems, database, and project work. Comfortable managing ambiguity and collaborating within teams, seeking a software engineering internship with the Client AI (Movidius NPU) team.

Technical Skills Profile

Focus on hard skills in this section.

Technical Skills

Java - Python - C - SML - HTML5 - CSS - Django - Android – LATEX - Software design patterns

Or group them together

Technical Skills

Coding languages: C/C++, Java, C#, PHP, Javascript, HTML, CSS, SML, Ruby, Perl

Technologies | Environments | O/S: Windows, Win32 API/GUI, Linux, MySQL, iOS, Android.

Education

Year From-To	Trinity College Dublin Master in Computer Science (MCS) / BA (Mod) in Computer Science Modules include: Software Engineering, Artificial Intelligence, Information Management	optional
	3rd Year – 2.1 2nd Year – 2.1 Include your results, all or just most recent. 1st Year – 2.2	
Year	Newtown Community College Leaving Certificate: 580 points, Top 3% in country, Maths, Science, English, Irish, History, Geography	

Relevant Experience: Internships/Work Experience

Relevant Experience

From – To

Job Title

Employer Name, Location

- Description of work carried out and skills (technical/soft) applied.
- Quantify your achievements/impacts where possible.
- What was the outcome of your work.

Relevant Experience: Internships/Work Experience

Summer 2026 Technology Intern, Vodafone, Dublin

- Supported the IT Infrastructure and Services team in maintaining and delivering customer-facing platforms, including billing and customer care systems.
- Assisted in testing a platform upgrade for Vodafone's convergence strategy, contributing to documentation and stakeholder reporting.
- Analysed service KPIs with the Performance and Governance Demand team, helping identify a workflow fix that cut average issue resolution time by 10%.

Jun – Aug 2025 Barista, The Coffee Bean, Dublin

- Worked part-time as a barista in a busy city-centre café. Developed strong communication, multi-tasking and time-management skills.
- Handled up to 150+ customer transactions per shift and was responsible for cashing out till and closing the café at end of day.

Projects

Year

Title of project

- Skills - what skills did you use, technical or soft.
- Problem – what problem were you trying to solve
- Outcome – what happened because of your work

Example:

2025

Fitness App, Frontend Lead

- Frontend Lead in 8-person team, managed 2 junior developers to deliver a cross-platform fitness app in React Native (iOS & Android)
- Led frontend development under an Agile workflow, assigning tasks, maintaining documentation, and ensuring on-time delivery of all sprint goals across the project lifecycle
- Researched and evaluated technologies, pitched solutions to clients, approach was approved and app successfully delivered to client sign-off.

*** Include personal projects if any and specify this**

Other Achievements / Interests / Activities

There are lots of things you can include in this final section. Think about what additional information you want to let the employer know about you.

- Society involvement
- Interests or volunteering activities with some info
- Hackathons and competition involvement
- Opensource contributions
- Certifications (LinkedIn, MongoDB, etc...)

Demonstrate your skills and competencies

2024 – present, Team member, TCD Hockey Club

- Attend two three-hour training sessions per week and compete in weekly matches through out term time.
- Organise one social event per term for 100 club members, including sourcing venues and securing discounts and deals.

2025 – present, Events Officer, Dublin University Computer Science Society

- Organised 15 events during the academic year, including tech showcases, hackathons and social nights.
- Liaised with industry sponsors including Workday and Stripe to organise and host tech talks. Managed scheduling and on-campus logistics to deliver events attended by 50+ students.

Use active verbs

Focus on achievements, outcomes, impacts

Start each point with an action verb, for example:

- Delivered
- Completed
- Identified
- Succeeded
- Initiated
- Achieved
- Implemented
- Enhanced

References

References available on request.

Usually you will be asked for two, one academic and one professional.

Always ask for permission!

Cover Letters

If in doubt, include a cover letter – in body of email or as an attachment

350 words max. Key points:

1. Why you're interested in the role
- 2 What you can do that they are looking for
3. Why you're interested in the company

See sample cover letter for guidance

Emails

1. Always include a subject – the name of the role you're applying to
2. Always write something in the email, never just send a CV with no email content
3. Make sure to attach the correct attachments for the role in pdf or doc

Edit

Put a face to the name...or leave a graphic. Just don't leave blank!

Make sure they can find and contact you!

Pin your best projects to the top and ensure they have a clear README. These are what employers will click on first.

List your course title and Trinity College Dublin. Employers search GitHub for this.

Could put in your LinkedIn profile if you don't have a personal site.

Using AI

Where it can help:

- Formatting, keyword checking, and grammar review
- Use AI to help refine each section
- Prompting ideas and suggestions to improve phrasing
- Tailoring, pick out the key skills in the job description and incorporate them into your CV.

What to be aware of:

- Hallucinations – makes up activities or numbers
- Uses lots of buzz words to say absolutely nothing with no evidence of what you have actually done
- Remember you have to be able to talk about your CV at interview.

Use AI as your collaborator, not to replace you!

Choosing the right internship

What do I want to do?

- What technical areas interest me most?
(AI, cybersecurity, software development, data science)
- What type of work environment suits me?
(startup vs. corporate, product vs. consulting, R&D vs. client-facing)
- Do I prefer breadth (varied exposure) or depth (specialization)?
- Geographic / location considerations.

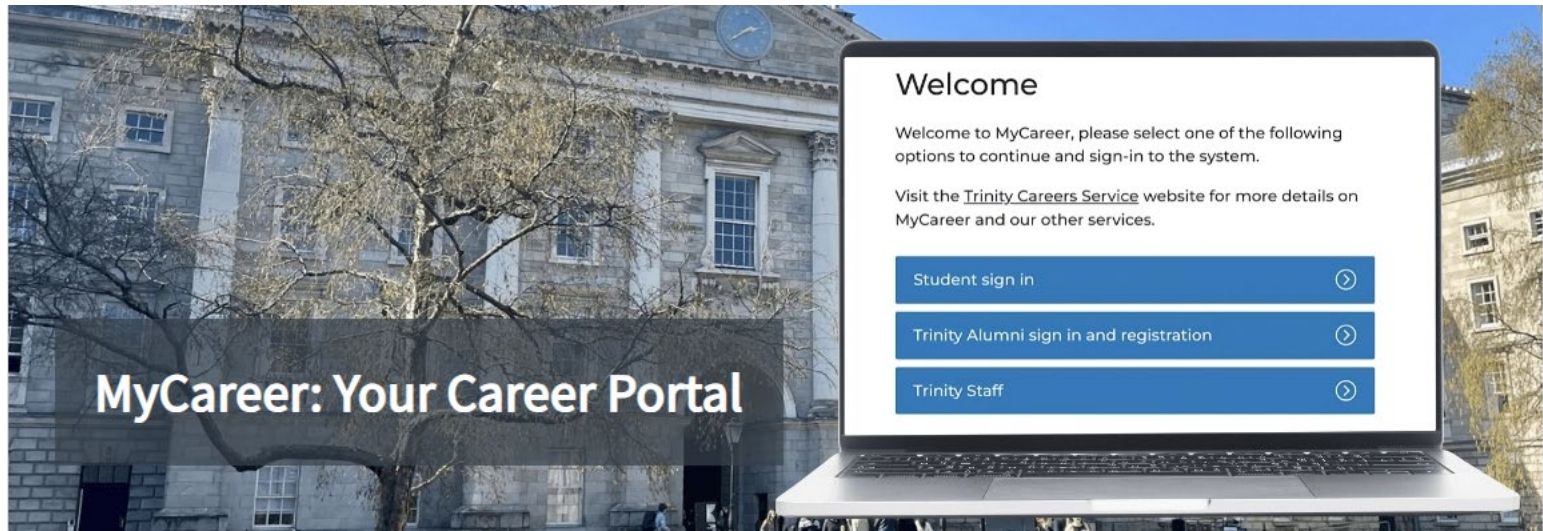

More things to consider...

- Skills gained vs. skills already developed.
- Company reputation vs. learning opportunities.
- Potential for conversion to full-time role.
- Alignment with long-term career interests.

Career Service Resources

CV / LinkedIn Clinics

- CV clinics online and in-person available.
- Sign up for the waiting list if no slots.
